

[LAB3_1] Write a C code to generate a triangle pattern based on a specified number of rows. For example, a triangle with 5 rows would be displayed in the following:

```
*****
 *****
  *****
   *****
    *****
```

Input

R represents a row of the triangle, where $1 \leq R \leq 100$

Output

A triangle with R rows

Input sample	Output sample
5	***** ***** ***** ***** *****
2	** *
